the European Union

HUMANITAS GAVAZZENI BERGAMO

Before a surgical operation, patients wear a helmet to ensure the utmost sense of relaxation through a combination of images and sounds capable of reproducing the sensations typical of cozy environments, isolated from reality. While immersed in their own vision, the patient is guided by a voice encouraging them to perform simple breathing control exercises, inducing a state of well-being that transforms a medical experience-experienced before, during, and after a surgical procedure- into a moment characterized by deep relaxation.
